

Activity Summary

DOT&E activity for FY09 involved oversight of 322 programs, including 44 major automated information systems. Oversight activity begins with the early acquisition milestones, continues through approval for full-rate production and, in some instances, during full production until deleted from the DOT&E oversight list.

Our review of test planning activities for FY09 included approval of 50 Test and Evaluation Master Plans (TEMPs) / Test and Evaluation Strategies, as well as 70 Operational Test Plans,

and two Live Fire Test and Evaluation (LFT&E) Strategies for inclusion in the TEMP. In FY09, DOT&E prepared 14 reports for the Secretary of Defense and Congress that included eight Beyond Low-Rate Initial Production Reports, one LFT&E Report, and four Early Fielding Reports.

DOT&E also prepared and submitted numerous reports to the Defense Acquisition Board (DAB) principals for consideration in DAB deliberations.

During FY09, DOT&E met with Service operational test agencies, program officials, private sector organizations, and academia; monitored test activities; and provided information to the DAB committees as well as the DAB principals, the Secretary and Deputy Secretary of Defense, the Under Secretary of Defense (Acquisition, Technology and Logistics), the Service Secretaries, and Congress. Active on-site participation in, and observation of, tests and test related activities remain the most effective tools.

In addition to on-site participation and local travel within the national capital region, approximately 781 trips supported the DOT&E mission.

Security considerations preclude identifying classified programs in this report. The objective, however, is to ensure operational effectiveness and suitability do not suffer due to extraordinary security constraints imposed on those programs.

Program Oversight

DOT&E is responsible for approving the adequacy of plans for operational test and evaluation and for reporting the operational test results for all major defense acquisition programs to the Secretary of Defense, Under Secretary of Defense (Acquisition, Technology and Logistics), Service Secretaries, and Congress. For DOT&E oversight purposes, major defense acquisition programs were defined in the law to mean those programs meeting the criteria for reporting under Section 2430, Title 10, United States Code (Selected Acquisition Reports (SARs)). The law (sec.139(a)(2)(B)) also stipulates that DOT&E may designate any other programs for the purpose of oversight, review, and reporting. With the addition of such “non-major” programs, DOT&E was responsible for oversight of a total of 322 acquisition programs during FY09.

Non-major programs are selected for DOT&E oversight after careful consideration of the relative importance of the individual program. In determining non-SAR systems for oversight, consideration is given to one or more of the following essential elements:

- Congress or OSD agencies have expressed a high level of interest in the program.
- Congress has directed that DOT&E assess or report on the program as a condition for progress or production.
- The program requires joint or multi-Service testing (the law (sec. 139(b)(4)) requires DOT&E to coordinate “testing conducted jointly by more than one military department or defense agency”).
- The program exceeds or has the potential to exceed the dollar threshold definition of a major program according to DoD Directive 5000.01, but does not appear on the current SAR list (e.g., highly classified systems).

- The program has a close relationship to or is a key component of a major program.
- The program is an existing system undergoing major modification.
- The program was previously a SAR program and operational testing is not yet complete.

This office is also responsible for the oversight of LFT&E programs, in accordance with 10 USC 139. DoD regulation uses the term “covered system” to include all categories of systems or programs identified in 10 USC 2366 as requiring LFT&E. In addition, systems or programs that do not have acquisition points referenced in 10 USC 2366, but otherwise meet the statutory criteria, are considered “covered systems” for the purpose of DOT&E oversight.

A covered system, for the purpose of oversight for LFT&E, has been determined by DOT&E to meet one or more of the following criteria:

- A major system, within the meaning of that term in 10 USC 2302(5), that is:
 - User-occupied and designed to provide some degree of protection to the system or its occupants in combat
 - A conventional munitions program or missile program
- A conventional munitions program for which more than 1,000,000 rounds are planned to be acquired.
- A modification to a covered system that is likely to affect significantly the survivability or lethality of such a system.

DOT&E was responsible for the oversight of 128 LFT&E acquisition programs during FY09.

Deliberate and Crisis Action Planning and Execution Segments (DCAPES)

Distributed Common Ground System – Air Force (DCGS-AF) Block 10

Distributed Common Ground System – Air Force (DCGS-AF) Block 20

E-4B National Airborne Operations Center (NAOC) Aircraft Replacement Program

Enhanced Polar System (EPS)

Expeditionary Combat Support System (ECSS)

F-15E Radar Modernization Program

F-22 – RAPTOR Advanced Tactical Fighter

F-35 Joint Strike Fighter (JSF)

Family of Advanced Beyond Line-of-Sight Terminals (FAB T)

Full Scale Aerial Target

Global Broadcast Service (GBS)

Global Command and Control System – Air Force (GCCS AF)

Global Hawk High Altitude Endurance Unmanned Aircraft System

Global Positioning Satellite IIIA (GPS IIIA)

Global Positioning Satellite Next Generation Control System (GPS OCX)

Global Positioning System (includes Satellites, Control, and User Equipment) (NAVSTAR GPS)

HC/MC-130 Recapitalization Program

Identification Friend or Foe Mark XIIA Mode 5 (all development and integration programs)

Infrared Augmentation Satellite

Integrated Strategic Planning and Analysis Network (ISPAN) Block 1

Integrated Strategic Planning and Analysis Network (ISPAN) Increment 2

Integrated Space Situational Awareness (ISSA) System

Interim Gateway

Joint Air-to-Surface Standoff Missile (JASSM) and JASSM Extended Range (ER) (including Electronic Safe & Fire Fuze (ESAF))

Joint Direct Attack Munition (JDAM) including Laser JDAM

Joint Primary Aircraft Training System (JPATS)

KC-45A

Large Aircraft Infrared Countermeasures (LAIRCM)

Miniature Air Launched Decoy (MALD), including MALD-Jammer (MALD-J)

Mission Planning Systems (MPS) Increments I-III including the Joint Mission Planning System (JMPS)

Mission Planning System (MPS) Increment IV

Multi-Platform Radar Technology Insertion Program (MP RTIP)

National Airspace System (NAS)

National Polar-Orbiting Operational Environment Satellite System (NPOESS)

AIR FORCE PROGRAMS (continued)

New Bomber (NB) (formerly called Next Generation Bomber (NGB))

Objective Gateway (OG)

Rapid Attack Identification, Detection, and Reporting System (RAIDRS) Block 20

Reaper MQ 9 Hunter Killer Unmanned Aircraft System (UAS)

Small Diameter Bomb Increment I (SDB I)

Small Diameter Bomb Increment II (SDB II)

Space-Based Infrared System Program, High Component (SBIRS HIGH)

Space-Based Space Surveillance (SBSS) and follow-on Blocks

Space Command and Control (C2)

Space Fence (SF)

Transformational Satellite Communications System (TSAT)

Wideband Global Satellite Communications Program (WGS)
